

CHORE-TRONICS® Feed Inventory System

Let's grow together®

Take the Guesswork Out of Knowing How Much Feed Is Left or When to Schedule a Feed Delivery

The CHORE-TRONICS® Feed Inventory System provides an economical way to monitor and manage the feed stored in feed bins on the farm. Producers can easily check feed bin weights by using the CHORE-TRONICS read-out screen. Getting precise weights aids in better managing feed inventories and helps prevent costly out-of-feed events. Designed to work as a stand-alone system, the feed inventory system can also be connected with the company's popular C-CENTRAL™ Software to provide multiple house and remote location monitoring.

Load Cells handle up to 10,000 lbs.
(4,500 kg) per feed bin leg

Load Cell Indicator Control is simple to operate for monitoring feed bin weights

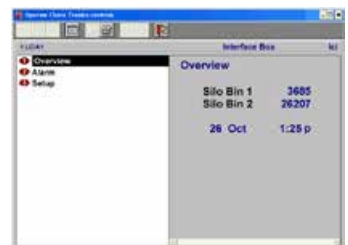

Economical, precise feed inventory management

Easy-to-read four-line viewing screen always remains lit

Product Features and Advantages

- Provides real-time inventory data for on-farm feed storage and consumption without needing to climb feed bins to visually check feed levels.
- System easily adapts to new or existing facilities.
- Rugged, weather-resistant load cells add six inches (152 mm) to overall bin height.
- Load Cell Indicator display unit:
 - Mounts on the feed bin or can be located in a building up to 1,000 feet (300 m) away.
 - Offers a built-in communication (FNM) board and data port for off-site monitoring.
 - Displays feed weights for up to two separate bins sitting on two different sets of load cells.
 - Shows weight in either pounds or kilograms along with date and time displayed with either 12- or 24-hour clock setting.
 - Practical screen navigation and edit keys offer quick indicator control set-up and changes.
 - Password-protected access feature restricts control operation to authorized users only. Alarm function alerts operator to system alarms and warnings and includes a list with the date and time of the 10 most recent alarm events.

Works with C-CENTRAL™ Software to remotely monitor feed inventories at the farm or off site

Kits Available	MODEL NUMBER	MAXIMUM SYSTEM WEIGHT	
		TONS	METRIC TONS
Two Six-Leg Bins	ST55000-K	60	54.4
