Pan and Trough Options for Feeding Breeders

ULTRAPAN® Feeder Offers Pan Feeding Benefits for Pullets and Breeders

- Feeder loop stays filled with feed for immediate delivery of feed to every bird at every feeding.

- Uniform, unpicked-over feed rations lead to better bird condition and uniformity.

- Each corrosion-proof plastic feeder incorporates feed-saving features and 14 openings to provide more eating space per bird than with chain feeders.

- Birds have less eating-time stress and can move easily to feed and water without the restriction of movement you get with a chain.

- Birds are not exposed to moving parts of equipment.

- Every day feeding is easily accomplished.

Reliable Bin Scales

Chore-Time's REVOLUTION® Rooster Feeder

Chore-Time's ULTRAPAN® Feeder for Pullets and Breeders is available with an adjustable hen-only grill (above) or a snap-on option (shown at right).

ULTRAFLO® Feeder Is a Trough Feeder Alternative to Chain Feeders for Breeders

- Fast feed delivery of 100 feet (30.5 m) per minute means no birds can eat until all birds can eat, eliminating competition, stress and picking over of feed.

- Auger flightings act as a grid to prevent raking and wasting feed while trough shape provides a natural "feed catch zone" for even greater feed savings.

- Feed savings and low horsepower requirements result in lower overall operating costs.

- System is easy to program and operate, with no corner units or links to cause breakdowns.

- The rotating action of the feeder's auger helps maintain an absolute mix of feed components for a direct "bin-to-bird" feed ration.

Chore-Time's ULTRAFLO® Breeder Feeding System quickly and reliably delivers uniform feed to every breeder hen. A variety of grill spacings and profiles is available to prevent males from eating the hens' ration.
